

ConvertaStep Product Information

Product Description

ConvertaStep is a revolutionary new product that offers access for nearly all residential applications. ConvertaStep is constructed of heavy-duty weather-coated steel to protect it from elements to ensure your investment lasts. The lift is inconspicuous to the eye, and most onlookers wouldn't even be aware of its presence, unlike traditional bulky expensive ramp systems. This small, cost-effective lift is available in three (3) sizes that can span from one to five steps, and be painted to blend with any homes style and exterior. It also stores flat so that guests and other residents can have full use of stairs.

Sizes Available

11" – 19"

19" – 26"

26" – 33"

Features

- Double weather-coated actuators
- Lift capacity: 750 lbs
- Remote control activation
- Requires little to no maintenance
- Unit comes pre-assembled reducing both installation time and cost
- Unit is powered off a 12V battery and battery maintainer that plugs into a standard 110 outlet
- Made in the U.S.A.
- One (1) year warranty on all parts

Specifications

- Overall dimensions: 44.95" x 93.58" x 11.46"
- Platform dimensions: 30.71" x 81.62"
- Rated load capacity: 750 lbs
- 11" side panels protect mechanicals
- Remote control activation, with optional emergency stop
- Motor-driven ball screw actuators
- Power supply: 12V DC battery
